Dear Dr. Yukawa,

Enclosed are 20 specimens from the collection of Dominique Collet. I processed these specimens through the Kenai National Wildlife Refuge's entomology collection so that they could be cataloged and labeled before sending them out to you.

Note the following relationships among these specimens.

KNWR:Ento:8764 was reared from KNWR:Herb:8744.

KNWR:Ento:8778 was reared from KNWR:Herb:8784.

KNWR:Ento:8781 was reared from KNWR:Herb:8790.

KNWR:Ento:8793 was reared from KNWR:Herb:8787.

Complete records for all of these specimens are available on the internet at URI's like <http://arctos.database.museum/guid/KNWR:Ento:8764> for the specimen with a catalog number of KNWR:Ento:8764.

Also, versions of Dominique's database, in which there are data pertaining to these specimens, are available on Arctos via this project's page at the URI below.
