Dear Dr. Foottit,

Enclosed are four vials of Psyllids from the Kenai National Wildlife Refuge, Alaska. We have many more specimens and probably some additional taxa among our material, but I have not had time to look over all of them yet. I have included representative specimens of the four species that I have so far tentatively identified.

| Specimen ID | Quantity | Taxon                            |
|-------------|----------|----------------------------------|
| 1646        | 29       | <i>Psylla minor</i>              |
| 1809        | 8        | <i>Craspedolepta alaskensis</i>  |
| 1842        | 1        | <i>Craspedolepta nebulosa</i>    |
| 2253        | 10       | <i>Craspedolepta subpunctata</i> |

Thank you for your willingness to look at our material. I intend to send you more specimens in the future.

Sincerely,

Matthew Bowser
