Dr. Benjamin A. Foote
Department Biol. Sciences
Kent State University
Kent, OH 44242

Dear Dr. Foote,

Enclosed are three specimens of Sciomyzidae from the Kenai National Wildlife Refuge. Two are clearly different than any of the specimens I mailed to you previously. The third is a *Tetanocera* that I could not comfortably assign to a species despite having before me determined specimens of several species of the genus.

specimen ID	Taxon
5354	?
5546	?
6149	<i>Tetanocera</i>

Thank you for your help with these flies. I hope that seeing these specimens is of some value to you.

Sincerely,

Matthew Bowser
